Art Unit: 3651

This application is in condition for allowance except for the following formal matters: Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

The Abstract is too long and contains legal phraseology.

In line 5 of claim 4 there is lack of antecedent basis for "the maximum deflection angle". Also in claim 4 it is not understood what a "spring effective way" might consist of.

In lines 3 and 4 of claim 5 it is not understood what a double deflection angle might consist of.

The spelling and grammar in the claims should be checked carefully by Applicant.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Claims 1-27 allowed.

Art Unit: 3651

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
